Dear Parent,

At VTech®, we know that every year, children are asking to play video games at younger and younger ages. At the same time, we understand the hesitation of most parents to expose their children to the inappropriate content of many popular video games. How can parents responsibly allow their children to play these games, and still educate and entertain them in a healthy, age-appropriate manner?

Our answer to this question is the V.Smile™ TV Learning System – a unique video game system created especially for children aged 3 to 7. The V.Smile™ TV Learning System combines kid-friendly design, age-appropriate curriculum, vivid graphics, and fun game-play into a unique experience that children will love and parents can support. The V.Smile™ TV Learning System engages children with two modes of play: the Learning Adventure - an exciting exploratory journey in which learning concepts are seamlessly integrated, and the Learning Zone - a series of games designed to focus on specific skills in a fun, engaging way. Both offer the child hours of learning fun.

As part of the V.Smile™ TV Learning System, VTech® offers a library of game Smartridges based on popular children's characters that engage and encourage your child to play and learn. The library is organized into three levels of educational play – Early Learners (ages 3-5), Junior Thinkers (ages 4-6) and Master Minds (ages 6-8) – so that the educational content of the system grows with your child.

At VTech®, we are proud to provide parents with a much-needed solution to the video game dilemma, as well as another innovative way for children to learn while having fun. We thank you for trusting VTech® with the important job of helping your child explore a new world of learning!

Sincerely,

Julia Fitzgerald
